

WHAT IS CLAIMED IS:

1. A needle for tattooing the skin or the eyebrow, the needle comprising a sharp end including a tapered portion having a plurality of raised elements
5 thereon, whereby puncturing the skin or the eyebrow with the needle will form a circular hole having an edge with a plurality of indentations therearound for permitting liquid dye to flow from the tapered portion into the skin or the eyebrow.
- 10 2. The needle of claim 1, wherein the raised elements are a plurality of spaced curves.
3. The needle of claim 2, wherein the curves are rightward or leftward.
- 15 4. The needle of claim 1, wherein the raised elements are a plurality of quadrilaterals formed by intersecting a plurality of spaced rightward curves and a plurality of spaced leftward curves.
5. The needle of claim 1, wherein the raised elements are a plurality of raised
20 points for forming a rough portion thereof.
6. The needle of claim 1, wherein the raised elements are either a plurality of spaced rightward curves disposed on the rough portion or a plurality of spaced leftward curves disposed on a rough portion thereof.
- 25 7. The needle of claim 1, wherein the raised elements are a plurality of quadrilaterals formed by intersecting a plurality of spaced rightward curves and

a plurality of spaced leftward curves on a rough portion thereof.

8. A plurality of needles for tattooing the skin or the eyebrow fastened together with the sharp end, and a sleeve fastened on rear portions of the sharp
5 ends, one of the needle comprising a sharp end including a tapered portion having a plurality of raised elements thereon, whereby puncturing the skin or the eyebrow with the needle will form a circular hole having an edge with a plurality of indentations therearound for permitting liquid dye to flow from the tapered portion into the skin or the eyebrow.

10

9. The needle of claim 8, wherein the raised elements are a plurality of spaced curves.

10. The needle of claim 9, wherein the curves are rightward or leftward.

15

11. The needle of claim 8, wherein the raised elements are a plurality of quadrilaterals formed by intersecting a plurality of spaced rightward curves and a plurality of spaced leftward curves.

20 12. The needle of claim 8, wherein the raised elements are a plurality of raised points for forming a rough portion thereof.

13. The needle of claim 8, wherein the raised elements are either a plurality of spaced rightward curves disposed on the rough portion or a plurality of spaced
25 leftward curves disposed on a rough portion thereof.

14. The needle of claim 8, wherein the raised elements are a plurality of

quadrilaterals formed by intersecting a plurality of spaced rightward curves and a plurality of spaced leftward curves on a rough portion thereof.

15. A needle for tattooing the skin or the eyebrow, the needle comprising a
5 sharp end including a tapered portion having a cross-section of a loop of teeth.
